

SHA @ parliament QUESTIONS

contact admin@socialisthealth.co.uk

SHA display from Labour Conference.

1. Will the government introduce a right-to-buy scheme that allows trusts to bring bad-value contracts into public ownership. by legislating for the right to enfranchisement? Will all staff be brought back in house?
2. Will the government publish a record of the true comparative costs of PFI contracts (financing, building and running costs) compared with traditional NHS funded hospitals?
3. What is the government's estimate of the costs of the NHS market in England?
4. Doctors warn of serious patient safety risks from the Physician Associate role in the NHS, with a recent [BMA survey suggesting some 87% of Doctors](#) find the current practice of Physician Associates to be a danger to patients, prompting legal action against the GMC from Anaesthetists United. With this in mind, can we move towards a pause on the recruitment of new PAs and a reassessment of the role? And whether plans exist for a national scope of practice for current PAs?
5. What measures has and will the government take to hold the government of Israel to account for the collective punishment of Palestinians and the targeting of health workers.
6. What measures is the government taking to respond to public concern about the use Palantir to provide a data platform for the NHS given its record in Palestine and around the world.
7. EDM This house notes the failure of previous PFI schemes and agrees to oppose PFI or versions of such schemes to fund NHS infrastructure.

We would also like to work on some material on the exploitation of migrant workers in the care sector.
